# Installation & Setup Guide

Step-by-step configuration for all components

## One-Time Setup

Complete these steps once after purchase. Estimated time: 90 minutes. You only need to do this setup once — after that, the system runs itself.

## Prerequisites

| Software                         | Minimum Version              | Used For                  | Cost            |
|----------------------------------|------------------------------|---------------------------|-----------------|
| Microsoft Excel or Google Sheets | Excel 2019 / Sheets (free)   | Practice Dashboard        | Free—Office 365 |
| Microsoft Word or Google Docs    | Word 2019 / Docs (free)      | All DOCX templates        | Free—Office 365 |
| Notion                           | Free plan                    | Client portal & workspace | Free tier OK    |
| QuickBooks Online / Xero / etc.  | Any current version          | Client bookkeeping        | Per client      |
| PDF reader                       | Any (Adobe, Preview, Chrome) | Guides & reference docs   | Free            |

## Phase 1 — Practice Dashboard Setup (Excel)

### Open 02-Practice-Dashboard/Bookkeeper-Practice-Dashboard-v2.xlsx

| # | Action                                        | Sheet                      | Notes                           |
|---|-----------------------------------------------|----------------------------|---------------------------------|
| 1 | Enter your practice name and tagline          | Setup                      | Yellow cells only               |
| 2 | Set your service tiers and prices             | Setup + Pricing Calculator | Drives all formulas             |
| 3 | Enter your monthly close schedule (which day) | Setup                      | E.g., "15th of following month" |
| 4 | Add your first 1-3 clients                    | Client CRM                 | Required for dashboard KPIs     |
| 5 | Add any active prospects                      | Lead Pipeline              | Track pipeline value            |
| 6 | Review the Dashboard sheet                    | Dashboard                  | Should auto-populate            |
| 7 | Read the Instructions tab                     | Instructions               | Formula and feature guide       |

Phase 2 — Client Document Customization

Each document contains **[BRACKETED PLACEHOLDERS]** — replace all of them with your specific details before sending to any client.

| File                                      | Key Placeholders to Replace                    | Priority             |
|-------------------------------------------|------------------------------------------------|----------------------|
| Bookkeeping-Service-Guide-v2.docx         | [PRACTICE NAME], pricing tiers, service scope  | High — client-facing |
| Bookkeeping-Proposal-Template-v2.docx     | [PRACTICE NAME], [CLIENT], fee structure       | High — per proposal  |
| Bookkeeping-Engagement-Agreement-v2.docx  | [PRACTICE LEGAL NAME], fee terms, jurisdiction | Critical — legal     |
| Client-Intake-and-Onboarding-Pack-v2.docx | [PRACTICE NAME], portal link, close deadline   | High — per client    |
| Canva-Bookkeeping-Proposal-Deck-v2.pptx   | Editable in PowerPoint or import to Canva      | Medium — optional    |

Legal Review Required

The Engagement Agreement is a legal document. Have a qualified lawyer review it for your jurisdiction before use. Do not send it to clients until it has been reviewed.

Phase 3 — Notion Workspace Setup

Follow this sequence to build your Notion workspace:

| Step | Action                                                             | Database Name     |
|------|--------------------------------------------------------------------|-------------------|
| 1    | Create a new Notion page called "Bookkeeping Practice"             | —                 |
| 2    | Import Clients.csv → Create database "Clients"                     | Clients           |
| 3    | Import Leads.csv → Create database "Lead Pipeline"                 | Leads             |
| 4    | Import Monthly-Close.csv → Create database "Monthly Close"         | Monthly Close     |
| 5    | Import Document-Requests.csv → Create database "Document Requests" | Document Requests |
| 6    | Import Invoices.csv → Create database "Invoices"                   | Invoices          |
| 7    | Import Tasks.csv → Create database "Tasks"                         | Tasks             |
| 8    | Import Client-Portal.csv → Create database "Client Portal"         | Client Portal     |
| 9    | Link "Client" property in each database → Clients database         | All databases     |
| 10   | Create client sub-pages and link using Relations                   | All databases     |

Phase 4 — Quality Check

| Check                      | How to Verify                                                  | Status |
|----------------------------|----------------------------------------------------------------|--------|
| Dashboard KPIs populated   | Open Dashboard sheet — should show client count and revenue    | [ ]    |
| All [BRACKETS] replaced    | Search "PRACTICE NAME" in Word — should find 0 results         | [ ]    |
| Notion relations working   | Click a task — client name should link to Clients database     | [ ]    |
| Pricing calculator formula | Enter test values — monthly revenue should calculate           | [ ]    |
| PDF files open correctly   | Open each PDF — should display with headers/footers            | [ ]    |
| License file read          | Read 01-Quick-Reference/License.pdf — understand permitted use | [ ]    |
