

AI Social Media Agency OS - Complete User Guide

Your step-by-step guide to setting up and launching your SMMA with the AI SMMA OS

Welcome to Your AI SMMA OS

Congratulations on investing in the most comprehensive social media agency operating system available. This guide walks you through every section of your purchase and shows you exactly how to use each file to build, run, and scale a profitable social media agency.

What you've downloaded contains everything you need to go from zero to running a professional, scalable SMMA -- from your first client proposal to your systems for managing 20+ clients.

How to Use This System

- * Start with 00_START_HERE for your complete onboarding checklist and 30-60-90 day action plan
- * Complete 01_AGENCY_SETUP first -- this builds your foundation: business plan, brand assets, and legal templates
- * Move through sections 02-06 in order as you acquire and onboard clients
- * Import all CSV files into Notion for a complete digital workspace (see 10_NOTION_WORKSPACE)
- * Use the PPTX files in Canva by importing them -- all dimensions are optimized for Canva compatibility

Section-by-Section Guide

00_START_HERE: Begin here. Contains your welcome guide, system overview, and complete onboarding checklist with 90-day action plan broken into daily tasks.

01_AGENCY_SETUP: 8 files covering business plan, financial projections, branding guide, legal contract templates, pricing calculator, and service menu.

02_CLIENT_ACQUISITION: 6 files including lead generation tracker, cold email templates, DM scripts, and objection handling vault.

03_PROPOSALS_CONTRACTS: 5 files with proposal templates, service agreements, scope of work templates, and payment terms.

04_CLIENT_ONBOARDING: 6 files including onboarding questionnaire, brand discovery form, client portal setup, and welcome email sequences.

05_CONTENT_CREATION: 7 files with content calendar templates, social media strategy guide, hashtag research system, content brief templates.

06_SOCIAL_MEDIA_MANAGEMENT: 6 files covering platform-by-platform strategy, scheduling guides, and community management SOPs.

07_CLIENT_REPORTING: 4 files including KPI dashboard, revenue tracker, report writing guide, and report email templates.

08_AI_TOOLS_STACK: 3 files covering AI tools directory, automation guide, and prompt engineering guide.

09_BUSINESS_OPERATIONS: 3 files covering annual business plan, hiring guide, and KPI dashboard.

10_NOTION_WORKSPACE: 8 files with 7 Notion-importable CSVs and setup guide.

11_BONUSES: 4 files including 365 social media captions, scripts vault, growth playbook, and AI prompt vault.

12_CANVA_TEMPLATES: 4 professional PPTX files that can be imported directly into Canva.

Notion Setup (10 Minutes)

- * Open Notion and create a new workspace called 'Agency OS'
- * Create a new page for each CSV file in 10_NOTION_WORKSPACE
- * On each page, click 'Import' -- 'CSV' and select the corresponding file
- * Each CSV includes BOM encoding for perfect Notion compatibility
- * Link your databases together: Client database links to Lead Tracker, Content Calendar links to Clients
- * Add your own pages for meeting notes, team updates, and creative briefs
