

Client Retention Workbook

Insurance Agency OS | 90-Day Retention & Growth Sprint

Why Retention Is Your #1 Growth Strategy

Acquiring a new client costs 5-7x more than retaining one. A 5% increase in retention can improve profitability by 25-95%. Your existing book of business is a growth machine — if you service it properly.

Month 1 — Audit Your Book

- Week 1: Categorize all clients by tier (VIP, A, B, C based on premium + referral activity)
- Week 2: Identify all clients without an annual review in the past 12 months
- Week 3: Identify all single-policy clients — cross-sell opportunity list
- Week 4: Review retention rate — how many clients cancelled in the past 12 months?

Month 1 Goal: Complete book audit; identify top 20 clients and top 20 cross-sell opportunities

Month 2 — Activate Relationships

- Week 5: Call every VIP client personally — no email, no text
- Week 6: Send anniversary notes to clients who've been with you 5+ years
- Week 7: Schedule 5 annual reviews with clients approaching renewal
- Week 8: Cross-sell outreach to top 10 single-policy clients

Month 2 Goal: 5 annual reviews completed; 2 cross-sell conversions

Month 3 — Systematize

- Week 9: Set up CRM reminders for every client touchpoint going forward
- Week 10: Schedule annual review calls for all clients renewing in next 60 days
- Week 11: Launch monthly email newsletter to full client database
- Week 12: Measure results — retention rate, cross-sell conversion, referrals generated

Month 3 Goal: Full retention system in place; annual reviews automated in CRM
