

# Staffing Agency OS - Complete User Guide

---

Your complete guide to launching and operating a professional staffing agency

## Welcome to the Staffing Agency OS

---

This system contains everything you need to build a professional, profitable staffing agency from scratch -- or to systematize and scale the agency you're already running.

- \* 10 organized folders with 40+ files covering every aspect of agency operations
- \* Start with 00\_START\_HERE for your 90-day launch plan
- \* Import CSVs in 08\_NOTION\_WORKSPACE for a complete digital agency workspace

## Understanding Your Revenue Model

---

- \* Direct hire at 20% fee on a \$80,000 salary = \$16,000 per placement
- \* 2 placements per month = \$32,000/month = \$384,000/year
- \* Contract staffing: 10 contractors at \$20/hour margin x 40hrs x 50wks = \$400,000/year
- \* These are realistic targets achievable by a solo recruiter within 18-24 months

## Your Recruiting Metrics

---

Track these metrics weekly to understand where in your funnel to focus:

- \* Candidates contacted per week: Target 30+ for active searches
- \* Response rate: Target 20%+ on LinkedIn outreach
- \* Pre-screen to interview rate: Target 60%+ of candidates who respond
- \* Submission to interview rate: Target 50%+ of submitted candidates get interviews
- \* Offer rate: Target 30%+ of interviewed candidates receive offers
- \* Acceptance rate: Target 85%+ of offers accepted
