

Welcome to OQUL EdTech OS 🖐️

Thank you for investing in **OQUL — the Complete AI Educational Business System**. This is not just documentation — it is a full operating system for running a modern, AI-powered educational business.

What You Just Purchased

A production-ready, enterprise-grade educational platform with AI tutoring, adaptive learning, full K–12 curriculum, and complete business operations infrastructure — packaged for immediate deployment.

What's Included

Platform Source Code

- Next.js 15 + React 19 frontend
- Node.js 20+ backend with Drizzle ORM
- 461 TypeScript/TSX production files
- PostgreSQL + Redis infrastructure
- Prometheus + Grafana monitoring

AI Tutor System

- Leila AI tutor (Arabic + Darija)
- Groq API streaming integration
- Adaptive learning algorithms
- Knowledge tracing engine
- Confidence scoring system

Curriculum Registry

- Complete K–12 curriculum (Grades 1–12)
- Primary school (6 levels)
- Middle school (3 levels)
- Secondary school (TC, 1BAC, 2BAC)
- Official exam alignment data

Business Operations

- SOP Library (40+ procedures)
- Subscription strategy playbook
- Client portal templates
- Onboarding checklists
- 90-Day growth plan

Templates & Tools

- Notion workspace templates
- Google Sheets KPI dashboards
- Canva design templates (12 types)
- Word document templates
- Email & proposal templates

Infrastructure & DevOps

- Docker Compose configurations
- Redis Sentinel (high availability)
- CI/CD GitHub Actions pipeline
- K6 load testing suites
- 50+ deployment scripts

API Endpoints

Your First 3 Steps

Read "Read Me First" (00_START_HERE folder)

- 1 Understand the product structure, what tools you need, and how everything connects before touching any files.

Follow the Installation Guide (01_INSTALLATION folder)

- 2 Set up your environment: Node.js 20+, PostgreSQL, Redis, and your Groq API key. The guide walks you through each step.

Explore the Business Documentation (02_DOCUMENTATION folder)

- 3 Review the Business Overview and SOP Library to understand how to position and operate this platform commercially.

You're fully supported

Every component of this system has been professionally documented, tested under load, and is ready for production deployment. You are not starting from scratch — you are starting from finished.

Pro Tip: Duplicate, Don't Delete

When customizing Notion templates or Google Sheets dashboards, always duplicate the original first. Keep the originals as reference templates for future use.
