

Folder Guide

This guide maps every folder and file in the OQUL EdTech OS package. Use it as your navigation reference whenever you need to find something.

Top-Level Package Structure

```
OQUL-EdTech-OS-v1.0/  
├─ 00_START_HERE/ ← Begin here  
├─ 01_INSTALLATION/ ← Setup guides  
├─ 02_DOCUMENTATION/ ← Business docs  
├─ 03_TEMPLATES/ ← All templates  
├─ 04_LEGAL/ ← License & terms  
├─ 05_SUPPORT/ ← FAQ & help  
├─ 06_META/ ← Versions & roadmap  
└─ source/ ← Full source code
```

00_START_HERE

The most important folder. Read all files in this folder before anything else.

File	Purpose
00_Cover.pdf	Product overview and visual identity
01_Welcome.pdf	What's included and first steps
02_Read_Me_First.pdf	Essential context before installation
04_Folder_Guide.pdf	This document — package navigation

01_INSTALLATION

Step-by-step setup and launch guides.

File	Purpose
03_Installation_Guide.pdf	Full environment setup (30–60 min)
05_Quick_Start_Guide.pdf	Fast-track for experienced developers

02_DOCUMENTATION

Business and technical documentation for operating the platform.

File	Purpose
Business_Overview.pdf	Platform capabilities and business model
Architecture_Guide.pdf	Technical architecture deep-dive
SOP_Library.pdf	40+ standard operating procedures
Curriculum_Guide.pdf	K–12 curriculum structure and management
AI_Tutor_Guide.pdf	Leila system documentation
Subscription_Strategy.pdf	Monetization and pricing strategy
90_Day_Growth_Plan.pdf	Launch to first 100 users plan

03_TEMPLATES

Sub-Folder	Contents
Notion/	Notion workspace export + setup guide
Google_Sheets/	KPI dashboard, revenue tracker, analytics
Canva/	12 design template links + instructions
Word_Documents/	Proposal, contract, onboarding DOCX files

Source Code Structure

```

source/
├─ src/
│  ├─ app/ ← Next.js pages (auth, dashboard, API routes)
│  ├─ components/ ← Reusable React components
│  ├─ features/ ← Feature modules (ai-tutor, gamification, etc.)
│  ├─ server/ ← Backend business logic (47 subdirectories)
│  ├─ db/ ← Drizzle ORM schema
│  ├─ lib/ ← Shared utilities, state, validators
│  └─ types/ ← TypeScript type definitions
├─ curriculum-registry/ ← JSON curriculum data (K-12)
├─ db/
│  └─ migrations/ ← 17 SQL migration files
├─ scripts/ ← 50+ seeding and utility scripts
├─ infra/ ← Docker + Prometheus + Grafana configs
├─ load-tests/ ← K6 performance test suites
├─ docs/ ← 50+ architecture markdown docs
└─ .github/workflows/ ← CI/CD pipeline configuration

```

Naming Conventions

All PDF files are numbered with a 2-digit prefix (e.g., 03_) indicating reading order. Numbered files should be read in sequence when setting up for the first time.
