What OQUL Is

OQUL (عقل — "mind") is an AI-powered adaptive learning platform for K–12 students. At its core is **Leila**, an AI tutor that teaches in Arabic, French, and Moroccan Darija dialect — creating a culturally authentic learning experience that traditional platforms cannot match.

Unlike generic AI tools, OQUL is purpose-built for the Moroccan curriculum, aligned to official Ministry of Education standards, and designed to adapt to each student's individual pace and learning style.

Core Value Propositions

Adaptive Intelligence

Every student gets a personalized learning path. Difficulty, pace, and content adapt in real-time based on performance data.

Cultural Authenticity

Leila speaks in Darija. Curriculum follows official standards. Content reflects Moroccan cultural context — not translated Western content.

Parent Transparency

Parents see exactly what their child is learning, their strengths, gaps, and progress — in real time. Builds trust and retention.

Revenue Model

Tier	Price	Features	Target
Free	€0/month	5 lessons/month, basic progress tracking	Top-of-funnel acquisition

Tier	Price	Features	Target
Student	€9–19/month	Unlimited lessons, all subjects, Leila AI, progress reports	Core revenue base
Family	€25–35/month	3 student accounts, parent dashboard, priority support	High-LTV families
School	Custom pricing	Bulk students, admin dashboard, teacher analytics, SLA	B2B enterprise

Unit Economics

Student Tier Projection
