

Support Guide

Everything you need to get help, report issues, and make the most of OQUL EdTech OS.

Start with Self-Service

Before contacting support, check the FAQ.pdf in this folder. 80% of common questions are answered there. The documentation in 02_DOCUMENTATION also covers most technical topics in depth.

Support Tiers

Self-Service (Instant)

- FAQ.pdf — 20 common questions answered
- Installation Guide.pdf — step-by-step setup
- docs/ folder — 50+ technical markdown docs
- Code comments in src/server/ directories
- Architecture Decision Records (docs/adr/)

Response: Immediate

Purchase Support (Included)

- Contact seller via Etsy messaging
- Installation assistance
- Configuration questions
- Bug reports for product defects
- Clarification on documentation

Response: 24–48 hours

Before Contacting Support

1

Check the FAQ first

Open FAQ.pdf in this folder. Your question is likely answered there.

2

Review the Installation Guide

Most issues relate to environment setup. Re-read the relevant section in Installation_Guide.pdf.

3

Check the docs/ folder

The source code comes with 50+ technical documentation files. For any architecture question, check docs/ARCHITECTURE_RULES.md or the relevant PHASE document.

4

Collect error information

Before reaching out, gather: the exact error message, which step failed, your Node.js version (node -v), and what you've already tried.

Troubleshooting Quick Reference

Problem	First Check	Solution
App won't start	Check <code>.env.local</code> exists	Copy <code>.env.example</code> to <code>.env.local</code> and fill all Required fields
Database connection error	Is PostgreSQL running?	Run <code>docker compose up -d</code> to start services
Leila AI not responding	Check <code>GROQ_API_KEY</code>	Verify key at console.groq.com , check rate limit status
Migrations fail	Database credentials correct?	Check <code>DATABASE_URL</code> format: <code>postgresql://user:pass@host:5432/db</code>
No curriculum content	Did you run seed scripts?	Run <code>node scripts/seed-full-curriculum.mjs</code>
Redis errors in logs	Is Redis running?	Check <code>docker compose ps</code> for Redis container status
Email not sending	SMTP credentials set?	Check <code>SMTP_HOST</code> , <code>SMTP_USER</code> , <code>SMTP_PASS</code> in <code>.env.local</code>
TypeScript errors	Node modules installed?	Run <code>npm install</code> then <code>npm run build</code> to check

Key Technical Resources

Architecture Docs

- `docs/ARCHITECTURE_RULES.md`
- `docs/FINAL_ARCHITECTURE.md`
- `docs/adr/` — Decision records
- `FINAL_BUILD_REPORT.md`

Phase Documentation

- `docs/PHASE55_*.md` — Current version
- `docs/PHASE54_*.md` — Curriculum align
- `docs/ROADMAP.md` — Future plans
- `docs/LAUNCH_READINESS_*.md`

External Documentation

Resource	For
nextjs.org/docs	Next.js App Router documentation
orm.drizzle.team	Drizzle ORM schema and migration docs
console.groq.com	Groq API key management and rate limits
redis.io/docs	Redis configuration and commands
bullmq.io	BullMQ job queue documentation
k6.io/docs	K6 load testing documentation

Pro Tip: Read the Phase Docs

The docs/ folder contains detailed documentation written during development. Each PHASE document explains WHY decisions were made, not just what was built. This context is invaluable when customizing the platform.
