

Changelog

Detailed log of all significant changes, additions, and fixes across all phases of OQUL EdTech OS development.

v1.0.0 — Initial Commercial Release

Latest January 2026

| New Features

- Phase 55 Adaptive AI Learning Platform module shipped
- Complete K–12 curriculum registry (Grades 1–12)
- Official alignment to Moroccan Ministry of Education standards
- Competency matrix for all assessed subjects
- Parent portal with real-time progress monitoring
- Email verification flow with SMTP integration
- Full observability stack (Prometheus + Grafana + Sentry)
- Redis Sentinel high-availability configuration
- K6 load testing suites for all core paths
- Product package with premium documentation

| Improvements

- Leila AI persona enhanced with Darija dialect support
- Adaptive learning paths refined with Bayesian knowledge tracing
- Gamification system: XP, streaks, badges, and adventure map
- Deep content enhancer for weak curriculum lessons
- Cognitive pacing algorithm improved for primary school students
- Daily challenge system with difficulty calibration
- BullMQ job queue optimized for AI request handling

| Bug Fixes

- Password reset email flow stabilized (FIXES.md references)
- Auth cookie handling on mobile browsers resolved
- Streaming response interruption on network loss handled
- Race condition in adaptive learning state updates resolved

Development Phase Highlights

Phase	Key Change	Type
Phase 55	Adaptive AI platform — full production release	Feature
Phase 54	Official curriculum alignment + competency matrix	Data
Phase 53	Full secondary school curriculum (TC/1BAC/2BAC)	Data
Phase 52	Full primary school curriculum (Grades 1–6)	Data
Phase 51	Full middle school curriculum (Grades 7–9)	Data
Phase 50	Deep content enhancement system + curriculum mapping	Feature
Phase 42	Middle school intelligence engine	Feature
Phase 40	Gamification + adventure map + daily challenges	Feature
Phase 38	Security hardening + child safety compliance	Security
Phase 29	Knowledge tracing + Bayesian learning algorithms	Feature
Phase 28	Emotional memory + human learning experience	Feature
Phase 27	Living learner intelligence + confidence scoring	Feature
Phase 14	Living learning system — first adaptive migration	Feature
Phase 8	Real-time AI streaming production hardening	Perf
Phase 5	Product API contracts defined (ADR-005)	Arch
Phase 2	JWT authentication + session management	Security
Phase 1	PostgreSQL database architecture + Drizzle ORM	Arch
Phase 0	Foundation: environment, architecture decisions	Arch

Staying Up to Date

Future updates to this product will be delivered as new downloads. Check your purchase receipt for update notification instructions. Major new phases (56+) will be announced separately.
