

Read Me First

Complete orientation guide for Bookkeeper Practice Launch System v2.0

DOCUMENT TYPE	Orientation Guide
VERSION	2.0 — June 2025
AUDIENCE	Product Owner

Welcome to Bookkeeper Practice

Launch System v2.0

Your complete operating system for a professional, scalable bookkeeping practice.

START HERE

Read this document first. It explains the full system, the 90-minute setup sequence, and how every file connects. Do not customize anything before reading this.

01 / 04 WHAT YOU RECEIVED

Folder	Contents	Purpose
00 — START HERE	Read Me First, Installation Guide, Asset Manifest, Start Here guide	Orientation and initial setup
01 — QUICK REFERENCE	License, FAQ, Version History, Support Guide	Reference and compliance
02 — PRACTICE DASHBOARD	Excel v2.0 — 10 sheets, KPI dashboard, formulas, dropdowns	Daily operations hub
03 — CLIENT DOCUMENTS	5 premium client-facing templates	Sales, proposals, and onboarding
04 — OPERATIONS LIBRARY	3 internal procedure and communication files	Service delivery and quality
05 — NOTION WORKSPACE	7 CSV databases and Notion setup guide	Digital client portal and CRM

Complete product structure — 26 files across 6 folders

02 / 04 THE 90-MINUTE SETUP SEQUENCE

- 01

Read the orientation guides (10 min)
Read this document and the Installation Guide in 00-START-HERE. Understand how the system works before customising anything.
- 02

Customise the Practice Dashboard (20 min)
Open 02-Practice-Dashboard/Bookkeeper-Practice-Dashboard-v2.xlsx. Fill all yellow Setup cells — practice name, service tiers, pricing, and close schedule. The Dashboard sheet auto-populates from your data.
- 03

Customise all client documents (25 min)
Replace every [BRACKETED PLACEHOLDER] across the 5 files in 03-Client-Documents. Use Find & Replace (Ctrl+H / Cmd+H). Begin with the Service Guide, which sets the tone for all others.
- 04

Build your Notion workspace (15 min)
Follow Notion-Setup-Guide.pdf in 05-Notion-Workspace. Import all 7 CSV files and create Relations linking each database back to the master Clients database.

- 05

Add test data and validate (15 min)

Add 2–3 sample clients to the Dashboard and Notion. Run the Pricing Calculator. Confirm KPI cards populate on the Dashboard sheet. Review all documents for missed placeholders.
- 06

Read the License (5 min)

Review 01-Quick-Reference/License.pdf before sending any document to a client. Understand what is and is not permitted under this commercial use licence.

03 / 04 THE CLIENT LIFECYCLE — HOW FILES CONNECT

Stage	Activity	File
Lead	Qualify entity, volume, software, complexity, urgency	Lead Pipeline (Dashboard)
Diagnostic	Review books, backlog, accounts, reporting needs	Client-Intake-and-Onboarding-Pack-v2
Proposal	Define scope, assumptions, cleanup fee, recurring fee	Bookkeeping-Proposal-Template-v2
Engagement	Sign contract, collect payment, confirm responsibilities	Bookkeeping-Engagement-Agreement-v2
Onboarding	Collect access, COA, documents, contacts, deadlines	Client-Intake-and-Onboarding-Pack-v2
Monthly Close	Reconcile, review, adjust, report, document exceptions	Dashboard + SOPs-and-Checklists-v2
Report Delivery	Deliver reports, explain variances, confirm next actions	Client Portal (Notion) + Scripts

Exhibit 1 · Complete client lifecycle — tool and file used at each stage

04 / 04 IMPORTANT NOTICES

PROFESSIONAL SCOPE — READ BEFORE USE

This product supports bookkeeping operations only. It does not constitute accounting, tax, legal, audit, assurance, payroll, or regulatory advice. Adapt all files to your credentials, jurisdiction, and permitted professional scope before use.

COMMERCIAL USE LICENCE

The buyer may customise and use these files within one bookkeeping practice and with direct clients. Resale, redistribution, sublicensing, sharing, or repackaging as a competing product is strictly prohibited. See License.pdf for full terms.
