

Notion Workspace Setup Guide

Build your complete client portal and internal workspace

VERSION 2.0 · 2025

Notion Workspace Setup Guide

Build your complete client portal and internal workspace in Notion

This guide walks you through building a fully connected Notion workspace using the 7 CSV databases included in 05-Notion-Workspace. Estimated setup time: 15-20 minutes.

The 7 Databases You Will Build

Database	CSV File	Purpose	Key Relations
Clients	Clients.csv	Master client records — the hub of your workspace	All other databases
Lead Pipeline	Leads.csv	Track prospects from first contact to close	—
Monthly Close	Monthly-Close.csv	Track close status for every client each month	→ Clients
Document Requests	Document-Requests.csv	Outstanding document requests per client	→ Clients
Invoices	Invoices.csv	Invoice tracking and payment status	→ Clients
Tasks	Tasks.csv	Internal tasks assigned by client and period	→ Clients
Client Portal	Client-Portal.csv	Client-visible items (reports, requests, etc.)	→ Clients

Step-by-Step Import Instructions

Step	Action	Notes
1	Create a new Notion page titled "Bookkeeping Practice"	This is your workspace root
2	Click "+ New page" inside it → choose "Table"	Start with Clients database
3	Click "Import" → "CSV" → select Clients.csv	First row becomes column headers
4	Rename the page "Clients" and click "Full page"	Makes it a top-level database
5	Repeat steps 2-4 for each remaining CSV file	Create all 7 databases
6	In Monthly-Close: Add a "Relation" property → link to Clients	Choose "Client" column
7	Repeat step 6 for Invoices, Tasks, Document-Requests, Client-Portal	Link each to Clients

8	In Clients: Add a Rollup for each linked database	Shows counts per client
9	Set up filtered views: e.g., "Active Clients", "This Month Close"	Use Filter in Notion
10	Add a Kanban view to Lead Pipeline (group by Stage)	Visual pipeline board
11	Add a Calendar view to Monthly Close (date: Due Date)	See deadlines at a glance
12	Share the Client Portal database with a client	Use "Share" → invite by email

Recommended Notion Views

Database	View Name	View Type	Filter / Group
Clients	Active Clients	Table	Status = Active
Clients	All Clients	Gallery	No filter
Lead Pipeline	Pipeline Board	Board	Group by Stage
Lead Pipeline	All Leads	Table	No filter
Monthly Close	This Month	Table	Period = current month
Monthly Close	Overdue	Table	Status ≠ Delivered, Due Date < today
Tasks	My Tasks Today	Table	Owner = me, Due = today
Tasks	By Client	Board	Group by Client
Invoices	Unpaid	Table	Status = Sent or Overdue
Document Requests	Outstanding	Table	Status = Requested

Property Types Reference

Column Name	Notion Property Type	Notes
Status	Select	Add color coding: green = Active/Paid, red = Overdue
Due Date / Close Day	Date	Set reminders on this property
Monthly Fee / Amount	Number → Currency	Set to your currency symbol
Client (relation)	Relation	Points to Clients database
Owner	Person	Assign to yourself or team members
Client Visible	Checkbox	Toggle for client portal sharing
Recurring	Select	Monthly, Weekly, Annual, One-time

Pro Tip: Daily Dashboard

Pro tip: Create a "Daily Dashboard" page in Notion that embeds linked views from each database — Tasks due today, Monthly Close in progress, and Outstanding Document Requests. This becomes your morning command center.
